

"Toward a Foundation for AGI"

Tuesday 11/29 at 5pm EST

Critical AI @ Rutgers and The Rutgers Center for Cognitive Science invite you to a special virtual lecture with

Gary Marcus

co-author of *Rebooting AI* and the substack, *AI We Can Trust*

Large pretrained language models like GPT-3 and PaLM have generated enormous enthusiasm, and are capable of producing remarkably fluent language. But they have also been criticized on many grounds, and described as "stochastic parrots." **Are they adequate as a basis for artificial general intelligence [AGI], and if not, what would a better foundation for general intelligence look like?**
